

PROJECT PROPOSAL

PROJECT TITLE: UMKC RESELL

TEAM:- 17

TEAM MEMBERS

- 1) Ravi Teja Soma
- 2) Shashank Reddy Yata
- 3) Vikas koduri
- 4) Anand Sanjay Reddy GundapuReddy

MOTIVATION

In our university many student come from different countries for education and start a new life with new requirements available at low cost i.e. the used things by the other people. So this application is for all the students who come to UMKC, so that they can use this application for selling or buying the used items, so that it will be very useful for all the students. Keeping all these in consideration we have planned to create a application "UMKC RESALE" which will look after all these points..

GOALS AND OBJECTIVES

- Every user who want to use this app will have to register in this application using the mobile and email
- in this application if the user has any objects like (furniture, electronics, books, household items.... etc) can put the items in the website for sale.
- this application also has a feature if the use wants any item he can request that item in the application.
- In this application all the items are divided into different categories (electronics, household, furniture, books... etc) so that it will be easy for the users to search the products.
- while the users is posting the products for resale or for buying the mobile number will be verified for the confirmation.
- With the above feature the users can contact them for finding the details of the project so that he can negotiate the price also.
- The user can also give ratings to the buyer and seller in the application based on buying or selling the products from the user.

SYSTEM FEATURES:

- Sell used items to customers directly
- buy items from the sellers
- contact the buyers and sellers

BIBLIOGRAPHY

- Referred to online websites for the information about the developer information about the similar projects.
- Online searches mostly used Google search engine.

BACKUP PROJECT:

PROJECT TITLE: POLICE DATABASE

- This application is used for the police people to store the data of all the crime related information so that once uploaded all the information will be reached to all the police officials.
- In this application all the data must be not open to everyone, depending on the authority level the permissions are assigned.
- This make the work easy for all the police officials as the entire data will be on the application and easy for the access
- All the cases information will be uploaded immediately so that they no need any paper work for the each case.
